SUMMARY

Data Analyst with 2.5 years of experience turning raw, high-volume data into automated dashboards and actionable insights. Proficient in SQL, Python (Pandas), Power BI, and Excel, with a track record of improving campaign efficiency and click-through rates through KPI reporting, A/B testing, and ETL pipeline development.

TECHNICAL SKILLS

Languages & BI: SQL, Python (Pandas, NumPy), Power BI, DAX, Power Query, Excel, Looker Studio, Jupyter Notebook

Databases & Cloud: SQL Server, MySQL, PostgreSQL, Azure Fundamentals, Snowflake (Basic)

Analytics: Data Visualization, KPI Reporting, A/B Testing, Forecasting, ETL Pipeline Development

EXPERIENCE

ASP OL Media Pvt. Ltd

Software Engineer (Data Analyst)

Pune, India

July 2023 – Present

- Built and maintained automated Power BI, Excel, and Looker Studio dashboards to track campaign, revenue, and user engagement trends for leadership and cross-functional teams.
- Designed SQL-based KPI reports (open rate, CTR, bounce rate, conversion rate, revenue per email), improving campaign efficiency by **15%**.
- Automated data cleaning and processing for **1M+ records** using Python (Pandas), cutting manual data-prep time by **60%**.
- Built ETL pipelines integrating multiple data sources, improving reporting accuracy and enabling real-time tracking.
- Ran A/B tests and correlation analysis on engagement drivers, driving a **12%** increase in click-through rate.
- Partnered with marketing, tech, and analytics teams to align performance-tracking pipelines across platforms.
- Documented data transformation and validation workflows, ensuring reproducibility and consistency across projects.

PROJECTS

Uber Taxi Trip Analysis | Power BI, DAX, Power Query

[GitHub Link](#)

- Built an end-to-end Power BI dashboard analyzing **103,728 Uber trips** in NYC (June 2024), covering \$1.55M in booking value across 5 vehicle types and 4 payment methods.
- Engineered **13 DAX measures**, including dynamic field parameters, **USERRELATIONSHIP** for inactive dropoff joins, **AVERAGEX+DATEDIFF** for average trip time, and **TOPN+SUMMARIZE** for top-location analysis.
- Designed a **3-page dashboard** (Overview, Time Analysis, Details) with a dynamic tab-switcher for toggling KPIs across all visuals simultaneously.
- Built a Day × Hour heatmap matrix and hourly area chart to surface peak demand windows and day-of-week booking patterns.
- Applied a custom dark theme and a star-schema data model linking fact and dimension tables for optimized query performance.

Blinkit Sales Report | SQL, Excel, Power BI, Python (Pandas)

[GitHub Link](#)

- Analyzed Blinkit sales data to surface region-wise and category-wise insights supporting business decisions.
- Built Power BI dashboards to visualize monthly sales, customer trends, and product demand patterns.
- Used SQL and Python to aggregate and clean data from multiple sources for accurate reporting.
- Developed KPIs for sales growth, product performance, and top-selling categories to aid inventory optimization.
- Added interactive filters, category drill-downs, and DAX measures to improve decision support.

EDUCATION

Shri Ram Institute of Technology

Bachelor of Technology – Computer Science and Engineering; CGPA: 8.4

Jabalpur, India

July 2019 – June 2023

- Key Courses: Operating Systems, Data Structures, Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases

CERTIFICATIONS

- Certificate Program in Data Analyst – SSC NASSCOM
- SQL Gold Badge & SQL (Basic) – HackerRank & University of Michigan
- Python Certified – Cisco Netacad
- Tableau Certified – University of California
